This item was presented in a three way PowerPoint presentation with Mark Cechman giving an Overview of the requests, John Rhoades addressing the transportation issues, and Applicant Tim Baker with building and site details. Mr. Cechman, Chief Planner, Land Development Studio, City Planning Division, discussed the specific requests, project location, existing conditions, adjacent zoning/land uses, right-of-way abandonment, site plan, elevations, multi-use trail, proposed phasing, renderings, master plan approval, zoning regulations, residential and non-residential parking supply and demand, findings by the Institute of Transportation Engineers, fire access, high-rise sign conditional use permit,
and concluded his portion of the presentation with notable conditions of approval and next steps if the requests were approved.

John Rhoades, Project Manager I, Transportation Planning Division, discussed the right-of-way abandonments’ transportation benefits for the City, proposed improvements to the North-South corridor, the urban multi-use trail system connection, the proposed revisions to the roadway configurations, proposed options for traffic control, and concluded discussing the traffic signal benefits.

Chairperson Tobin opened the hearing to the public.

Applicant Tim Baker, Baker Barrios Architects, concluded the presentation with the building and site details. He stated that in an effort to involve the public, they had many community engagements which included neighborhood meetings, community work-shops, and dialogues with individuals of the community. They also created a website survey in order to obtain feed-back from the community. Based on the feed-back obtained, they have made some revisions to their plans. Baker noted that the community’s main concerns had to do with transportation issues in the neighborhood that were already existing and not a result of the development. He concluded his presentation stating that the proposed roadway improvements might alleviate some of the existing transportation issues.

Ms. Becky Wilson, 215 N. Eola Dr., Orlando, FL 32801, also representing the applicant requested to reserve some time in order to answer any questions from the Board and/or the public.

Discussion ensued between the Board, City staff and the applicant in regards to parking for the restaurants and street parking.

The following speakers addressed the Board with their concerns:

b) Would like to have Midway closed to prevent cut-through the neighborhood;  
c) Not enough space for a sidewalk around the lake without impacting the lake. |
| Jerry Weiss – 718 S. Lake Formosa Dr., Orlando, FL 32803 | a) Concerned about density being quadrupled;  
b) Scale of project too large for the neighborhood;  
c) Concerned about having a 9-story building next to the lake; suggested the 9-story building be placed on the commercial side and/or reduced. |
| Robert E. Smith – 350 E. Pine St., Orlando, FL 32801 | Suggested connecting Gertrude’s Walk with Florida Hospital and Urban Trail. |
| Laura Jones – 1612 Baltimore Ave., Orlando, FL 32803 | a) Parking concerns – parking on the street will worsen if there is a charge for retail parking;  
b) Environmental impact a 9-story building may have on Lake Formosa;  
c) Concerned for protected species – eagle and osprey nests in the area. |
| Dan O’Keefe – 300 S. Orange Ave. #1000, Orlando, FL 32801 | Left – did not speak. |

Chairperson Tobin closed the public hearing and called for a 10 minute break at 10:37 a.m. The meeting was resumed at 10:46 a.m.

Rebecca Wilson referred to the addendum in regards to the amended required conditions of approval for the traffic study. She noted that the study would reveal if/how the realignment of Alden Rd. would impact the neighborhood before the commencement of the development. She pointed out that money from the impact fees would be set aside for the implementation of any changes needed. Ms. Wilson also stated that utility poles would be placed underground to make sidewalks more usable.

Discussion ensued in regards to retail parking. Ms. Wilson noted that the retailers would want easy and convenient parking for their customers and added that it has not been decided if parking will be free or if there will be a charge. Discussion continued in regards to residential parking and parking permits. Mr. Rhoades noted that without enforcement the permits would be useless and the Orlando Police Department was not in favor of that system. Residents would still be able to park on the street, and Ms. Wilson noted that more street parking spaces were being added. She also noted that parking at the garage for the residents of Philadelphia Ave. could be considered. In regards to bike trail connectivity, Mr. Rhoades stated that the City would be pursuing any chance for connectivity to the trail system, but needed to acquire right-of-way from property owners within the trail and City funding. Regarding bike parking concerns, he noted that the developer was required to meet City Code. In regards to the traffic study being effective, Mr. Rhoades and Mr. Grandin emphasized on the impact fee money being set aside to correct any problems identified as a result of the study. Mr. Grandin believed the realignment of Alden Rd. would be of great help. Regarding cut-through traffic concerns, Mr. Rhoades stated that the City was looking into various options to prevent the cut-through traffic through the neighborhood.

Board members Searl, Skidelsky, Anderson, and Buchanan expressed their approval of the project and encouraged City staff, applicant, developer and neighbors to continue to work together to address any concerns during the development phases.

*Board member Burns moved APPROVAL of the requests, ABN2014-00004, MPL2014-00041 and CUP2015-00001, subject to the conditions in the staff report. Board member Buchanan SECONDED the MOTION, which was VOTED upon and PASSED by unanimous voice vote.*
