

## Group 9

### Streetscape

The landscaping around the Publix on Edgewater Drive is consistent and attractive. The store overhangs are well maintained and are aesthetic, contributing to the fabric of the streetscape. Edgewater Drive needs more lighting at night so that passersby can still view the streetscape. However, the street lights are too boxy and should be replaced with lapidaries. On other parts of Edgewater the vegetation is overgrown; some people appreciate the natural appearance and others think it should be more manicured. Although the streetscape has attractive features, it could also use more symmetry and connectivity.

### Traffic

Edgewater Drive has gone from 4 lane traffic to 3 lanes and that was a significant improvement. The traffic situation is not bad in the morning, but at night it gets worse. There are too many lights for such a street. Other traffic control techniques should be utilized to slow cars down.

### Pedestrians

Sidewalks are too narrow and they have limited access. Need more bulb outs, traffic control boxes, and pedestrian signage. The trees along the sidewalk are impediment but the greenery is a nice touch. Crepe myrtle is an attractive plant to use.

### Community Feel

We need to help the healthy businesses grow within a limit. Expanding commercial areas east and west without negatively impacting the residential areas will give the community balance.
