MULTI-USE TRAIL SAFETY

MULTI-USE TRAIL SAFETY TIPS

SAFE TRAIL NETWORK

One of the City of Orlando's main priorities is creating a safe and comfortable environment for users of the trail network. To help create this scenario the City believes in having an informed citizenry regarding trail safety. The purpose of this brochure is to provide informational material to residents and visitors about safe trail usage techniques.

BE RESPECTFUL AND COURTEOUS

All users of the trail, including cyclists, walkers, rollerbladers, and other users, should be respectful and courteous to each other. The City of Orlando encourages all users to be aware of their surroundings.

SLOWING OR STOPPING

When slowing down or stopping please move off of the trail. Be sure when you are stopping or slowing that other users of the trail are aware of your movements.

BE PREDICTABLE

While riding on the trail be sure to ride in a consistent and predictable manner. Riding in a consistent manner increases trail safety and reduces the chance of an accident.

KEEP TO THE RIGHT

Stay on the right half of the trail while riding, except when passing another trail user.

OBEY ALL TRAFFIC SIGNS AND SIGNALS

Follow the rules of the road and be cautious on while using any trail.

DO NOT LITTER!

Please do not leave plastic, aluminum cans, glass, paper, or any other garbage on or near the trail. The trail network has various trash receptacles along the trail for refuse.

ALCOHOL AND DRUG USE IS PROHIBITED

Do not use the trail if you are under the influence of alcohol or drugs. Any use can impair your judgment and cause injury to yourself or others.

BE CONSIDERATE OF PRIVATE PROPERTY

The trail network is public property; however adjacent to the trail is private property. Please respect the rights of private property owners and be good neighbors.

TRAILS ARE NOT FOR RACING

The trail network has engineering and design limits for travel speed. If your travel speed exceeds these limits you have become a danger to other trail users. Please find alternative routes that suit your travel needs. Finding the right bike route for your needs is safer and more enjoyable for all users.

PASS ON THE LEFT

When passing another trail user please pass them on the left. Before passing be sure to give the proper hand signal to alert users that are behind you. After the passing movement make sure that there is ample room for you to pass and return to the right side of the trail. When passing children or animals it is important to give extra room due to a certain level of unpredictability.

USE LIGHTS AND SOUNDS

Use lights whether you are riding or walking on the trail. Lights are required on vehicles and are highly encouraged for walkers. Using lights makes you more visible to other trail users and helps reduce accidents.

When passing another user give a signal by using your voice, bell, or horn before passing. Be sure the user you are passing has acknowledged your warning.

WEAR A HELMET

Properly wearing a helmet when cycling on the trail network can save your life. Always remember to wear a helmet when riding your bicycle.
