**Where does the water come from?**

1. The average home produces approximately 400 gallons of wastewater daily.

Wastewater from parts of Orange and Seminole counties is pumped to the City’s Iron Bridge Regional Water Reclamation Facility in South Seminole County.

2. Nineteen miles of berms were built to create 18 wetland cells, and 67 water control structures were incorporated into the system. A 75-acre lake was created to provide fill for the berm construction.

3. Of this highly treated reclaimed water, up to 35 million gallons a day are sent to the 1,200 acre man-made wetlands where aquatic plants further remove nutrients.

4. Today the wetland system provides habitat for numerous animal species, including over 200 bird species, otters, foxes, deer, turtles, snakes and alligators.

It takes approximately 40 days for the reclaimed water to filter through man-made marshes before reaching the St. Johns River.

---

**Facts**

- Orlando Wetlands Park represents the first large scale man-made wetland designed to treat reclaimed water and provide wildlife habitat.
- Nineteen miles of berms were built to create 18 wetland cells, and 67 water control structures were incorporated into the system. A 75-acre lake was created to provide fill for the berm construction.
- Of this highly treated reclaimed water, up to 35 million gallons a day are sent to the 1,200 acre man-made wetlands where aquatic plants further remove nutrients.
- Today the wetland system provides habitat for numerous animal species, including over 200 bird species, otters, foxes, deer, turtles, snakes and alligators.
- Over 2 million aquatic plants and 200,000 trees were planted to create the wetlands.
- Oyler Overlook is an earthen mound created from thousands of yards of muck and cattails. The mound is approximately 30 feet tall and gives visitors an outstanding view of the surrounding wetlands.

Reminders
Please sign in when you arrive and sign out when you leave to help us monitor park usage.

- Leave pets at home. **Pets are not allowed on the property. (Horses are permitted)**
- Leave your car in the parking area and enjoy a peaceful walk. **Motorized vehicles are prohibited.**
- Bicycles are restricted to the unpaved, elevated berm roads that crisscross the artificial wetlands, and must yield the right of way to pedestrians.
- To protect native plants and animals, bicycles are not allowed on the hiking trails, road shoulders or in the woods.
- Fishing, swimming and boating are prohibited.
- Camping and cooking fires are not allowed on the property.
- Be prepared for primitive hiking by bringing water, sun protection, comfortable shoes and insect repellent.
- A cooler of cold drinks and snacks will be a welcome treat after your long walk. Please help us keep the park clean by removing all trash which you produce during your visit.
- Be considerate of others. Loud noises frighten away wildlife. **Leave radios at home.**
- Keep wildlife on the wild side. **Don’t harass or feed the animals.**
- Leave wildflowers and plants for others to enjoy. **Collecting living plants or animals is not allowed.**
